Dualflow

Place hands inside the Dualflow hand dryer. An electronic system based on infrared sensors will detect them and the unit will start automatically working and go on with no interruption during 23 seconds. When hands are removed the Dualflow dryer will stop

Speedflow

The exterior design of the Speedflow makes it ideal not only for use in the most modern surroundings but also, in response to the challenge of functionality for every user, we have created a (wall mounted) dryer which protrudes less than 4 inches from the wall in compliance with ADA requirements

Machflow

Machflow is the fastest, intelligent, eco-friendly and powerful hand dryer available in the market, with a maximum speed of 325 km/h and amazing low noise level only 68 – 75 dB The Machflow will dry hands in only 8 to 12 seconds, designed using triac electronics and no heating element, two features that give Machflow a very...

Mediflow

The Mediflow is a sensor operated hand dryer with a thermostatic control system. A long lasting compact unit with anti-vandalism features. Electronic control system selects fully automatic for each drying cycle the heating capacity required for optimal airflow temperature.

Smartflow

The exterior design of the Smartflow makes it ideal not only for use in the most modern surroundings but also, in response to the challenge of functionality for every user, we have created a (wall mounted) dryer which protrudes less than 4 inches from the wall in compliance with ADA requirements.
